

Table Evidence for Research Dossiers

This paper studies table grounded evidence extraction. It reports that table markdown preserves metric names and helps compare model variants in generated dossiers.

Table 2: The hybrid parser improves required fact recall from 0.76 to 0.93 on table heavy papers.

Parser	Required Fact Recall	Latency Seconds
Text-only	0.76	5.1
Hybrid parser	0.93	6.4

Figure 2: Table chunks are routed with nearby captions so the synthesis step can cite metric context.
